Tip/Complaint: Ex 6 Phone message received on the EPA hotline. He called us on Saturday morning at 9:30 to complain about the strong odor that was coming from the Wagner well pad (# 790).  PIC returned his call. He said the source of the odor is a chemical pond that began collecting liquid in the last few days. The smell is sickening him so much that he can't stay in his home. He said it is a Range Resource chemical pond. The citizen told me that it is coming from a newly functioning chemical pond that is collecting fracking waste liquid. PIC gave him Kurt Smith's name and phone number for the PADEP Region 5 office. Kurt's name is listed as the tip and complaint coordinator.

Tip/Complaint: Incident happened on Range Resources rig Sidewinder 209 in Lycoming County. They ran pipe into the pre-drilled well loaded with oil based drilling fluid. Shortly after drilling through the cement plug the formation took a kick. They did not have the flare assembled to bleed off gas causing excess pressure downhole. They tried circulating again and the well had a blowout. Oil based fluid was sprayed all over location and also covered the surrounding trees around the pad. They are currently bulldozing the trees and land to try to clean up the spill.

Tip ID # 117498 Date/Time Received: 05/08/2014 - 8:02:00 AM Submitter: Mr. Chris Lauff	Alleged Violator: Range Resources Carter Impoundment 317 Fort Cherry Rd. McDonald, PA McDonald, Pennsylvania NA (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: yes	Intent: Unknown Type: Release Media: Land Entity: Company	Directions to site:
---	--	--	----------------------------

Subject: Regional Tip and/or Complaint - Pennsylvania Recipient: Regional Tip and/or Complaint morris.makeba@epa.gov,connor.garth@epa.gov	HQ Lead Number: FY14-117498-3800-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category: Region 3 - Marcellus Shale - Other
Tip/Complaint: Call Received by Jim Kline. Input by Matthew Lee. I spoke with Mr. Chris Lauff today. Mr. Lauff lives very near the Range Resources Carter Impoundment at 317 Fort Cherry Rd. McDonald, PA. Mr. Lauff contacted the EPA and was referred to me by Rob Staves. Mr. Lauff stated that his wife and son witnessed a roll-off with a DOT SP-11406 Radioactive waste placard arrive at the Carter Impoundment on April 30, 2013. The roll-off was then dropped and staged at the Range Resources well pad that is adjacent to the Carter Impoundment. The roll-off has not moved since it was staged there on the 30th. According to Mr. Lauff, he contacted both Alan Eichler and Barb Bookser (PA DEP O&G and DEP Radiation). Mr. Lauff was told the roll-off left the Carter Impoundment and was refused by the receiving landfill because of the radioactive readings. Mr. Lauff stated that the roll-off was returned to the Range Resources well pad, that is when his wife and son saw it. Mr. Lauff stated that Barb Bookser told him that the radiation readings from the roll-off was 350 microrem. Mr. Lauff did not know if other readings were taken from the Carter Impoundment or any other areas. Mr. Lauff further stated that Barb Bookser told him the roll-off would be staged there for at least 30 days until final analytical reports are completed. Once the reports are received, then Range Resources could determine a suitable receiving landfill for disposal. Mr. Lauff stated that the contents in the roll-off came from the weir tanks at the Carter Impoundment. He is concerned about the entire situation and what radiation readings might be coming from the impoundment itself. Mr. Lauff believes that the impoundment is constructed in the seasonal high groundwater table and that the impoundment is leaking. Mr. Lauff stated that he was at the Pittsburgh DEP Regional Office yesterday and conducted a file review concerning the Carter Impoundment.			
Continued Communication Date Sent: May 15, 2014 Time Sent: 7:55:00 AM To: NONE Cc: From: Region Subject: Final Disposition Message: HQ Lead Number: FY14-117498-3800-CV Potential Violator's State: Pennsylvania Reference Lead Number: Potential Violator's Name: Range Resources Carter Impoundment Case Number: Official: Region Statue: Unassigned Action: Under Review Disposition: Assigned Notes: I received a return call and spoke with Ms. Barb Bookser today. Barb is from the PA DEP Southwest Regional Office and is the Section Chief of Radioactive Materials and Special Projects. Ms. Bookser stated that Mike Arch, EHS Manager at Range Resources notified her about the roll-off. Ms. Bookser stated that the DEP was on site yesterday and collected samples from the roll-off. Ms. Bookser stated that she went over the public exposure limits along with industrial worker exposure limits with Mr. Lauff. She informed Mr. Lauff that the roll-off reading was below those levels. Jim Kline asked Ms. Bookser to call him once a survey was completed on the removed weir tanks and to notify him if she received any additional information. J. Kline has not yet received a return call from Alan Eichler, PA DEP Oil and Gas. J. Kline will notify Mr. Lauff once I have spoken with Alan Eichler. On 8/21/13, ATSDR issued its decision letter accepting his petition. In the petition, ATSDR notes that there is an air data gap but sufficient data for a focused groundwater evaluation.  Ex 5 Finally, the actual health consultation which evaluates this data will take longer, at least until winter before it is final and released is ATSDR's best guess as of early September.

Subject: Regional Tip and/or Complaint - Pennsylvania Recipient: Regional Tip and/or Complaint morris.makeba@epa.gov,connor.garth@epa.gov	HQ Lead Number: FY13-99750-3709-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category: Region 3 - Marcellus Shale - CWA
Tip/Complaint: Drilling is 5 miles away from his house. There are two NG wells, 5 abandoned wells within 300- 400 yards of NG wells. He reported that the water in his well had bubbles in it, and appeared grayish silver, then is turned brown. He had PADEP test the water, He also sent a ample to Conti Testing Lab, and their report stated that the water is not suitable for consumption. The Conti Lab report also stated that the water should be analyzed for methane/ethane. Rich Killian of OECEJ has copies of both lab reports.
